

9 August, 2011

Press release

Result of the inspection on radioactive materials in skipjack tuna

The result of the inspection conducted on 9 August, 2011 was as follows. This information is posted on Kochi Prefecture's website.

Table: Result of the inspection on radioactive materials in skipjack tuna

Unit: Becquerel (Bq)/kg

Sample	Sampling area	Sampling date	Iodine-131	Cesium-134	Cesium-137	Cesium total
Skipjack tuna (<i>Katsuwonus pelamis</i>)	Offshore Tosa Bay	8 August,	Not detectable	Not detectable	Not detectable	Not detectable

- Provisional Regulation Value for fish consumption established by the Government of Japan:

Radioactive iodine 2,000 Bq/kg

Radioactive cesium 500 Bq/kg
