

Result of the inspection on radioactive materials in fishery products  
(alfonsino, southern mackerel and whitebait)

The result of the inspection conducted on 18 August, 2011 was as follows. This information is posted on Kochi Prefecture's website.

Table: Result of the inspection on radioactive materials in fishery products  
(alfonsino, southern mackerel and whitebait)

Unit: Becquerel (Bq)/kg

Sample	Sampling area	Sampling date	Iodine-131	Cesium-134	Cesium-137	Cesium total
Alfonsino ( <i>Beryx splendens</i> )	Sea area around Kochi Pref.	12 August, 2011	Not detectable	Not detectable	Not detectable	-
Southern mackerel ( <i>Scomber australasicus</i> )	Sea area around Kochi Pref.	17 August, 2011	Not detectable	Not detectable	Not detectable	-
Whitebait	Sea area around Kochi Pref.	15 August, 2011	Not detectable	Not detectable	Not detectable	-

- Provisional Regulation Value for fish consumption established by the Government of Japan:

Radioactive iodine 2,000 Bq/kg

Radioactive cesium 500 Bq/kg
