Results of the radioactivity inspection on fisheries products from offshore trawlers

National Federation of Medium Trawlers and its member organizations have implemented the inspection on radioactivity level in fisheries products in accordance with the instruction by the Fisheries Agency of Japan.

The inspection results are as follows.

Radioactive iodine: 2000 Becquerel/kg

Radioactive caesium: 500 Becquerel/kg

* The Becquerel (symbol Bq) is the unit of radioactivity, defined as the number of nucleus decays per second.
