Iwate Prefectural Government

Results of the Project for inspection on radioactive materials in fishery products
(Project of the Fisheries Agency of Japan- further report of 1st week of October)

1. Measurement of radioactivity in fisheries products was conducted under the Fisheries Agency's "Project for Inspection on Radioactive Materials in Fishery Products", in order to provide safe fishery products to consumers.
2. The result of the inspection conducted this week was as follows. Radioactivity was below the provisional regulation values set by the Government of Japan in all the samples. Safety of these products was confirmed.

Results of inspection (further report of 1st week of October)

Item	Sampling site	Sampling agent	Sampling date	Measurement date	Measurement result (unit: Becquerel/kg)		
					Radioactive iodine I-131	Radioactive cesium	
						Cs-134	Cs-137
Pacific saury (<i>Cololabis saira</i>) Whole body	Offshore northern Sanriku Region	Miyako Fish Market	5-Oct	7-Oct	Not detectable (<0.42)	Not detectable (<0.47)	Not detectable (<0.49)
Pacific cod (<i>Gadus macrocephalus</i>)	Offshore Miyako City	Iwate Trawlers Association	5-Oct	7-Oct	Not detectable (<0.74)	18	22
[Reference] Provisional Regulation Value for fish					2,000	500	

(Note 1) Measurement facility: Japan Chemical Analysis Center

(Note 2) The numbers in the parenthesis indicate the detection limit in analysis.
