Press Release

Yamagata Prefectural Government

24 October, 2011

Inspections on radioactive materials in agricultural, animal and other products
produced in Yamagata Prefecture

Yamagata Prefectural Government has conducted inspections on radioactive materials in Red seabream (*Pagrus major*) sample taken in Yamagata Prefecture. The result of the inspection is as follows. Safety of the product is confirmed.

[Results of the inspection]

Sampling date	Inspection date	Item	Sampling site	Inspection result (Unit: Bq/kg)		
				Radioactive iodine	Radioactive cesium	
					Cs-134	Cs-137
20 Oct.	24 Oct.	Red Seabream (<i>Pagrus major</i>)	Shonai Area (Tsuruoka town) Offshore Yamagata	Not detectable (0.59)	Not detectable (<0.65)	Not detectable (<0.64)
Provisional Regulation Value				2,000	500	

*1 Inspection facility: Yamagata Prefectural Institute of Public Health.

2 The number in parenthesis is detection limit.

Note: "Not detectable" means that concentration of radioactive materials is lower than the detection limit.

"Detection limit" means the lowest concentration which inspection equipment can detect
