Press Release

Yamagata Prefectural Government

7 November, 2011

Inspections on radioactive materials in agricultural, animal and other products  
produced in Yamagata Prefecture

Yamagata Prefectural Government has conducted inspections on radioactive materials in Chum salmon (*Onchorhynchus keta*) sample taken in Yamagata Prefecture. The result of the inspection is as follows. Safety of the product is confirmed.

[Results of the inspection]

Sampling date	Inspection date	Item	Sampling site	Inspection result (Unit: Bq/kg)		
				Radioactive iodine	Radioactive cesium	
					Cs-134	Cs-137
7 Nov.	7 Nov.	Chum salmon ( <i>Onchorhynchus keta</i> ) (wild)	Shonai Area (Yuza town) Gakko river	Not detectable (0.86)	Not detectable (<0.91)	Not detectable (<0.97)
Provisional Regulation Value				2,000	500	

\*1 Inspection facility: Yamagata Prefectural Institute of Public Health.

2 The number in parenthesis is detection limit.

Note: "Not detectable" means that concentration of radioactive materials is lower than the detection limit.

"Detection limit" means the lowest concentration which inspection equipment can detect
