Results of the inspection on radioactivity level in fisheries products
produced in Tokyo (alfonsino)

In relation to the accident occurred at the Fukushima Daiichi nuclear plant, the Tokyo Metropolitan Government implemented its first inspection on fisheries products produced in Tokyo.

1 Inspection details and result

(1) Facility that conducted the analysis

National Research Institute of Fisheries Science, Fisheries Research Agency, Japan

(2) Inspected item

Fisheries products landed in Tokyo alfonsino

(3) Inspection result

The result of the inspection on the alfonsino samples landed in Oshima Town (at the Habu fishing port) is as follows.

Sampling date	Item	Fishing port	Radioactive caesium
29 March, 2011	Alfonsino	Habu fishing port (Oshima Town)	Not detectable

Reference: Provisional Regulation Value (fish) 500 Becquerel /kg

2 Future actions

The Tokyo Metropolitan Government will continue to implement inspections on radioactivity level in fisheries products in Tokyo in cooperation with the relevant authorities.
