Results of the inspection on radioactivity level in fisheries products
produced in Tokyo (No.3) (tosakanori seaweed)

In relation to the accident occurred at the Fukushima Daiichi nuclear plant, the Tokyo Metropolitan Government implemented its third inspection on fisheries products produced in Tokyo.

1 Inspection details and results

(1) Facility that conducted the analysis

National Research Institute of Fisheries Science, Fisheries Research Agency, Japan

(2) Inspected item

Fisheries products landed in Tokyo tosakanori seaweed (*Meristotheca papulosa*)

(3) Inspection result

The result of the inspection on the tosakanori seaweed sample landed in Toshima Village (at the Toshima fishing port) is as follows.

Item	Fishing port	Sampling date	Inspection result	
			Radioactive iodine	Radioactive caesium
Tosakanori seaweed (<i>Meristotheca papulosa</i>)	Toshima port (Toshima Village)	3 April, 2011*	4.91 Becquerel/kg	Not detectable

Reference: Provisional Regulation Value (seaweed) Radioactive iodine 2,000 Becquerel/kg, Radioactive caesium 500 Becquerel /kg

*Tosakanori seaweed is sold to the market after being salted and stored for about two weeks.

2 Future actions

The Tokyo Metropolitan Government will continue to implement inspections on radioactivity level in fisheries products in Tokyo in cooperation with the relevant authorities.
