Press Release

Yamagata Prefectural Government

24 June, 2011

Inspection on radioactive materials in agricultural, animal and other products
produced in Yamagata Prefecture

Yamagata Prefectural Government has conducted an inspection on radioactive materials in the ayu sweetfish sample taken in Yamagata Prefecture. The result of the inspection show that the radioactivity level of the sample is considerably lower than the Provisional Regulation Value established by the Food Sanitation Act, and that consumption of the product is safe.

[Results of the inspection]

Sampling date	Inspection date	Item	Sampling site	Inspection result	
				Radioactive iodine	Radioactive cesium
21-22 June	24 June	Ayu sweetfish (<i>Plecoglossus altivelis</i>)	Murayama area, Sagae City (Sagae River, a tributary of the Mogami River)	Not detectable	2.9
Provisional Regulation Value				2,000	500

(Inspection facility: Yamagata Prefectural Institute of Public Health)
